

MCU - ESP-12F (ESP8266)

USB-C Input + ESD

USB-UART Bridge (CP2102N)

LiPo Charger (MCP73831)

Air Quality PCB

Power Path + 3V3 LDO

Servo Output

Air Sensor (BME688)

Servo 5V Boost (MT3608)

Power Flags

WiFi Mode Switch (SW4): POS.1 = OFF (GPIO12 low) - POS.2 = SPARSE, upload 1x/h (both inputs high) - POS.3 = CONTINUOUS (GPIO14 low). Read at boot with internal pull-ups (no external pull-ups: +3V3 stays alive in deep sleep).

ESP8266 + BME688 + SG92R
